

SuiteStyles® custom uniform ordering solution

Online shopping site with quality products, customer service and home delivery.

Your facility is unlike any other. So are your staff uniform needs. With SuiteStyles, we tailor a uniform program and easy-to-use website to fit your specific goals.

Custom retail websites made easy

We'll build intuitive sites for all of your departments and disciplines, with unique logins for every employee. We offer four different formats that make it easy to process orders your way:

- **Piece allowance**—lets you allot a specific number of garments to each employee and receive your invoice later (our most popular option)
- **Credit card**— employees purchase garments on the site using their own credit card
- **Purchase order**—ideal for administrators or managers placing large orders that will be invoiced to your facility
- **Punch Out site**—can integrate into your internal system. This site requires more development time and resources

Complete product line and Color-by-Discipline

- **Color-by-Discipline**—program helps patients and families quickly identify your employees' roles by the color they're wearing
- **Scrubs, lab coats and uniforms**—select from a variety of styles and colors to meet your facility needs
- **Custom logo and embroidery**—high quality stitched embroidery and text options available
- **True Fit**—size and fit recommendation tool to achieve a more accurate fit; available on women's and men's garments

Customer service and home delivery

- **Dedicated customer service team manages all aspects of online shopping**— including order assistance, returns, troubleshooting and more
- **Orders delivered anywhere in the US**—the most efficient option is to ship directly to your employees homes
